TWENTY-FIFTH

ANNUAL REPORT

ON THE

CITY OF DUBLIN

Municipal Technical Schools.

SESSION 1910-1911.

We have pleasure in presenting the Twenty-fifth Annual Report of the City of Dublin Technical Schools.

During the Session, which opened on the 28th of ^{Enrolment.} September, 1910, 1,872 Students were enrolled. Most of them took Courses of Study in two or three different subjects, so that the number of Class Entries was as large as 4,975, and it is satisfactory to know that the attendance was regular and well-maintained.

Towards the end of the Session a large proportion ^{Examinations.} of the Students entered for the Standard public Examinations of the Board of Education, the City and

Guilds of London, the Royal Society of Arts, &c., and the fact that over 600 Certificates have been obtained is evidence of the merits of both teachers and students.

Many of these Certificates have been gained in the highest Grades and Stages, and a considerable number are First Class or Honours.

Special
Awards.

Some special successes which are worthy of note have been gained by our Students. Hugh Keogh won Second place in the Three Kingdoms in the examination of the City and Guilds of London in Plasterers' Work, Ordinary Grade, and obtained the Bronze Medal and the Money Prize of the Worshipful Company of Plaisterers.

In the Examinations under the Royal Society of Arts the First place in the Three Kingdoms in the Advanced Stage of Precis-writing, with the Society's Silver Medal and Prize of £3, was gained by Michael Quane. The Second place in the Advanced Stage in Arithmetic, with the Society's Silver Medal and Prize of £2, was secured by Jeremiah Hegarty. The Second place in the Intermediate Stage in Arithmetic, with the Society's Bronze Medal and Prize of £1, was gained by Bernard O'Neill.

A Student of our School of Music (Pianoforte Class), Miss E. Gaffney, gained the Coronation Medal of the London College of Music.

University
Examinations.

Several of our Students who had matriculated in the Royal University were successful in obtaining Degrees of the National University, chiefly in Mathematics and Physics, but the number who will seek Degrees in our new University must gradually

diminish to vanishing point, owing to the requirement of attendance at the University Lectures. On the other hand, the number of those Students who look for Degrees in the London University is rapidly increasing, and early in the Session we received a request signed by a large body of Students to constitute our Schools a Centre for its Matriculation Examinations. We felt, however, that if we should at once comply with this request we might seem to be lacking in loyalty to our Irish Universities, and, accordingly, we brought the request before the Senate of the National University, expressing our earnest hope that they would, by recognising our higher Science Courses, allow our Students to compete and qualify for University Degrees. We understand that the Senate have the matter under consideration, and, pending their decision, we have delayed taking action. It might at the same time be well worthy of the consideration of the Dublin Corporation whether the Municipal aid to the new University might not most appropriately take the form of Scholarships, which would place within the reach of Students of the Municipal Technical Schools the advantages of University training and the distinction of University Degrees.

In various local tests our Students won success. At Local Awards. the Industrial Exhibition held by the Royal Dublin Society the First, Second and Third Prizes were gained by our Students in Art Iron Work, and the First and Third Prizes in Modelling. At the Irish Food and Cookery Exhibition held early in the Session, the Students of our Cookery Classes, in open competition, won a Bronze Medal and First and Second Prizes in numerous tests.

Extension
Courses.

Extension Courses in Domestic Economy were conducted at various Centres in our City, and the instruction was so popular amongst the wives and daughters of our artisan population that we hope to further extend this most useful work.

Printing
School.

We regret that no substantial improvement has been achieved in the support accorded to our Printing School. The smallness of the attendance is all the more surprising as the Printing Trade of our City is very considerable, and the Dublin Typographical Society is, we believe, one of the largest and strongest of local Trade Unions. Perhaps it is that the novelty has worn off the venture, and that, as the Masters have taken but meagre interest in the School, the apprentices have found little inducement to attend. We had looked for encouragement towards further extension, more especially by inaugurating Classes in Lithography, Photo-mechanical process work and Book-binding, and we feel sure that, if greater interest were taken in this project, our Dublin Craftsmen might readily win fame and wealth for our City by development of the Printing and Book-producing Crafts.

Re Opening of
Bolton Street
Institute.

In our last year's Report we expressed the hope that the new Bolton Street Technical Institute would be completed before the commencement of another Session, and we are glad to announce that the Building is now open. The Printing Classes and some of the Building and Engineering Classes are definitely located there, and, pending the provision of full equipment for these and the other Science and Craft Classes for which the Institute is intended, the Classes

of our School of Commerce are being temporarily conducted in the new Building. During the Session now in progress we purpose having a series of Lectures on popular subjects, and no effort will be spared to make the work of our Schools attractive as well as useful.

We again offer our thanks to the Annual Subscribers Donors. for their continued support of our Schools and to the Employers and Trade Societies who have manifested their interest in our work by gifts and prizes.

Appendix A. to this Report gives the names of the Appendices. successful Students and Prize-winners resulting from the examinations on the Session's work; B. Summary of the Examination Results; C. the number of Students enrolled in the several Classes; D. Analysis of the Trades and Occupations of the Students; E. List of the Subscribers and Prize Donors to the Schools. A statement of the Income and Expenditure concludes the Report.

T. A. FINLAY,
Chairman.
